GCEI Investor Overview

Global Clean Energy, Inc. | OTCID: GCEI

Customized AI-enabled operations. Managed over time.

What GCEI Does

Global Clean Energy, Inc. (GCEI) builds and manages customized AI-enabled operational capabilities. Through AI Operations Accelerator, the company connects people, company knowledge, systems, and workflows to support measurable operational improvement.

What Customers Purchase

AI Operations Accelerator combines reusable technology, human expertise, and ongoing management to improve how work gets done. An engagement can begin with one workflow and expand into broader operations as customer needs and adoption grow.

Scope, fees, responsibilities, service levels, and outcome measures are defined for each engagement.

How GCEI Earns Revenue

Implementation Fees: Where applicable, initial fees cover configuration, integration, and launch.

Recurring Managed Fees: Ongoing fees cover the technology, expertise, support, and management included in the engagement.

Expansion Revenue: Engagement value can grow as customers add workflows, systems, or broader operational responsibilities.

GCEI also provides business-development services. These engagements generate revenue while providing opportunities to apply and improve its AI-enabled operating approach.

Outcome measurement does not necessarily mean payment is contingent on achieving those outcomes. Recurring managed fees are not all software subscription revenue.

Commercial Focus

Its focus includes government acquisition, contractor business development, and emergency response and risk management through ResilientIQ.

Applications & Growth

ResilientIQ

AI Operations Accelerator for Emergency Response and Risk Management. ResilientIQ applies the same core operating approach to help teams monitor risk, prepare for disruption, understand changing conditions, and coordinate response.

Data Science Research Team — Planned

A dedicated-team offering for complex data and research challenges, including analysis, predictive modeling, machine learning, and model evaluation.

What Could Drive GCEI’s Growth?

More Customers: Win new engagements in selected commercial and government markets.

Broader Engagements: Expand from an initial workflow into additional functions and operational needs.

More Efficient Delivery: Reuse capabilities and improve delivery practices to support greater customer scope without equivalent increases in delivery resources.

Additional Applications: Apply the same foundation to other customer needs where domain expertise and commercial demand support expansion.

These are strategic objectives, not guaranteed results. Execution depends on customer acquisition, retention, adoption, delivery quality, contract economics, and available capital.
